Project Design Phase II

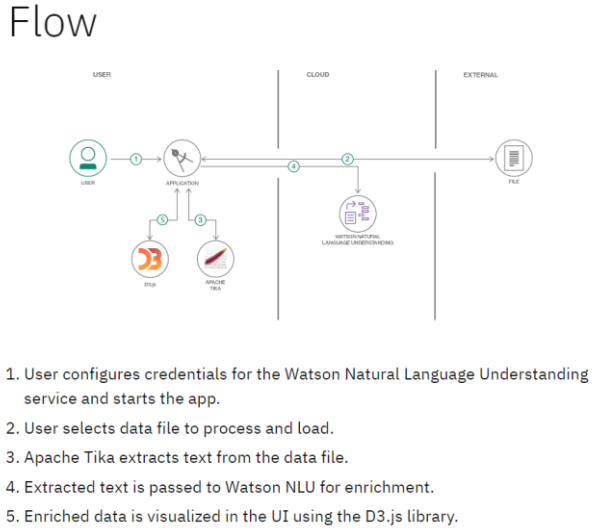

Data Flow Diagram & User Stories

Date	10 September 2026
Team ID	SWUID2026190374
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Project-Specific DFD:

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee	Laptop Request	USN-1	As an employee, I can submit a laptop request with required details.	Request is created and mandatory fields are validated.	High	Sprint-1
Employee	Laptop Request	USN-2	As an employee, I can select a laptop type and provide business justification.	Choice and justification are stored.	High	Sprint-1
Employee	Request Tracking	USN-3	As an employee, I can view my request status.	Current lifecycle state is visible.	High	Sprint-1
Manager	Approval	USN-4	As a manager, I can approve or reject a laptop request.	Decision and approver are recorded.	High	Sprint-1
Manager	Approval	USN-5	As a manager, I can review requirements before approval.	Complete request details are displayed.	High	Sprint-1
IT / Asset Team	Validation	USN-6	As an IT agent, I can validate employee eligibility and existing assets.	Validation is recorded.	High	Sprint-2
IT / Asset Team	Fulfillment	USN-7	As an IT agent, I receive a fulfillment task for an approved request.	Task is created and assigned.	High	Sprint-2
IT / Asset Team	Fulfillment	USN-8	As an IT agent, I can update fulfillment progress.	Task and request status are updated.	High	Sprint-2
System	Notification	USN-9	As the system, I notify stakeholders at key lifecycle events.	Correct recipient receives the update.	Medium	Sprint-2
Administrator	Reporting	USN-10	As an administrator, I can monitor laptop requests.	Requests can be filtered and reported.	Medium	Sprint-3
